

We proudly support today's lifeline systems and passionately pursue tomorrow's challenges.

Regardless how times may change, at Kansai EP we remain resolutely committed to one overriding mission: to provide stable energy supplies. As a key force supporting the lifeline systems that underpin daily life and social development, we engage in the generation, distribution and sale of energy responsibly and proudly. In line with our social obligation we also take proactive steps to address environmental issues, as illustrated by our significant progress in areas including reduction of CO₂ emissions, environmental management systems, and the development of an environmentally sustainable community. Against the backdrop of these energy-related involvements, we also support and cooperate with corresponding initiatives overseas as we continuously challenge new realms of possibility in R&D for tomorrow's global needs.
